

**Business aviation
is Climbing. Fast.
It's more than a
tagline. It's a promise.**

Climbing. Fast. is an initiative to showcase business aviation's many societal benefits, from driving opportunities for today's workforce to leading sustainability innovations to reach net-zero carbon emissions by 2050.

***Climbing. Fast.* on a mission to net-zero.**

An incubator for sustainability solutions, business aviation is at the forefront of developing and certifying electric, hybrid and hydrogen propulsion systems that will enable aircraft to fly carbon-free.

Today the industry is championing the production and distribution of sustainable aviation fuel (SAF), which is derived from sustainable feedstocks and can reduce net carbon emissions by 80%.

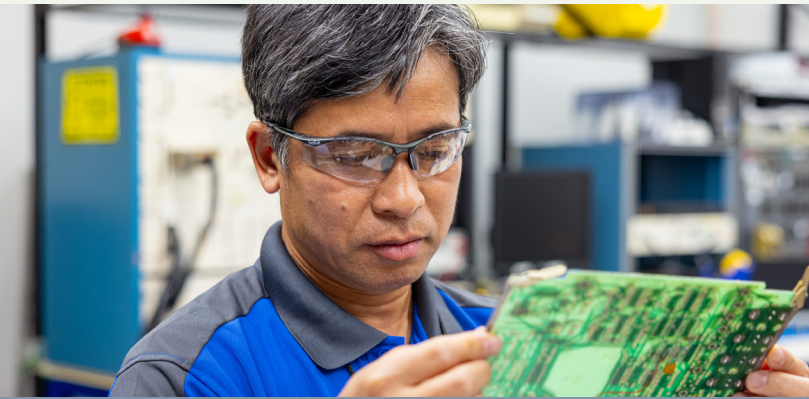

**Innovations in business aviation mean
new aircraft can be as much as:**

35% more efficient

**Business aviation has
enhanced efficiency by:**

40% over the last 40 years

Business aviation drives economic opportunity, supporting:

1.2M
American jobs

\$246B
in economic output

Climbing. Fast. to new jobs & economic opportunities.

General aviation is an essential American industry, with a legacy of investing in new technologies and sustainability solutions that drive opportunities for today's workforce.

General aviation has gained an edge in an increasingly competitive global marketplace. Business aircraft allow key employees to visit three locations in a single day, rather than a single location in three days.

Business aviation provides access to:

5,000 airports across the U.S.

.....
compared to commercial airlines'
500 access points

Climbing. Fast. to provide even more humanitarian relief.

In times of crisis, business aircraft have long played a role in providing relief for people and communities in need. During natural disasters, business aircraft can use roadways as runways to reach isolated locations.

Climbing. Fast. to connect communities, big and small.

Business aviation is bridging America's urban and rural communities, operating as a vital transportation source for towns and citizens who live in the last mile, and connecting these communities to the world.

Business aircraft complete around:

15,000 flights each year

.....
to support humanitarian efforts, many of which are coordinated with American Red Cross workers, United States Army soldiers, and U.S. National Guard units
